

Sometimes you wish you had the perfect size enclosure because just that quarter of an inch makes a world of a difference. Now it is possible to have just what you want through Par's new revolutionary idea of giving our customers just what they ordered. We have been working with the idea of flexible manufacturing for years and now we have mastered it.

Any size

If you do not see what you need in our extensive line of enclosures, just ask. From the smallest enclosure to the largest enclosure, we can manufacture any size of any construction.

Quick delivery

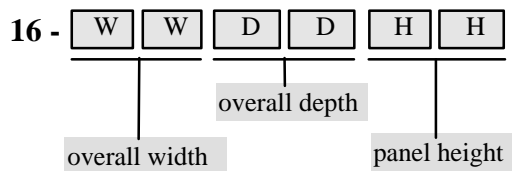

Our applications engineers are eager to serve you. And it shows with 2 to 10 day delivery from confirmation of your order. We can give you a price quote on your custom enclosure while you are still on the phone!

No minimum

That's right. No minimums and no strings attached. Whether it is one or 10,000, we can quote the lowest prices or bid lower than any price you can find.

It's easy

You determine what material to use. Then, using our easy part numbering system, you can create your own part numbers. For example: You are looking for a 5.25" H x 12" W x 15" D enclosure. Your part number is 16-12155x. Our part numbering system works as follows: 16-WWDDHH where WW is the width, DD is the depth, and HH is the height. Then round off all numbers to the nearest inch. Construction will be similar to our Series 10 with .09" thick aluminum material unless otherwise specified to your need. You can also choose the 14 series front panel and make the new **18 series** instead of the 16 series.

Even more choices

We provide unlimited options for punching holes or cutouts. We use CNC punching for small quantities that combines speed and low cost. You can also specify your choice of finish, including texture, gloss and flat enamel colors, or have your enclosure anodized, alodined, or EMI shielded. Silk-screening also available upon request.

Large Quantities

Par has formed a manufacturing company in the Far East that enables us to give our customers the lowest prices anywhere in the U.S. Custom enclosures, as with our standard, are U.S. made. Upon request, we will give you our lowest price that our joint venture can offer.

So look no further

Par offers you millions of different combinations that even all the other companies combined can't. So why have a file full of catalogs when you really need only one. Try us. You'll be satisfied and glad you did. Call (800)829-7116 now and have a complete manufacturing company in your hands.

Choose the semi-custom sizes

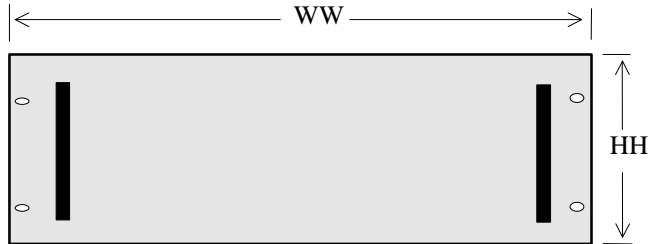

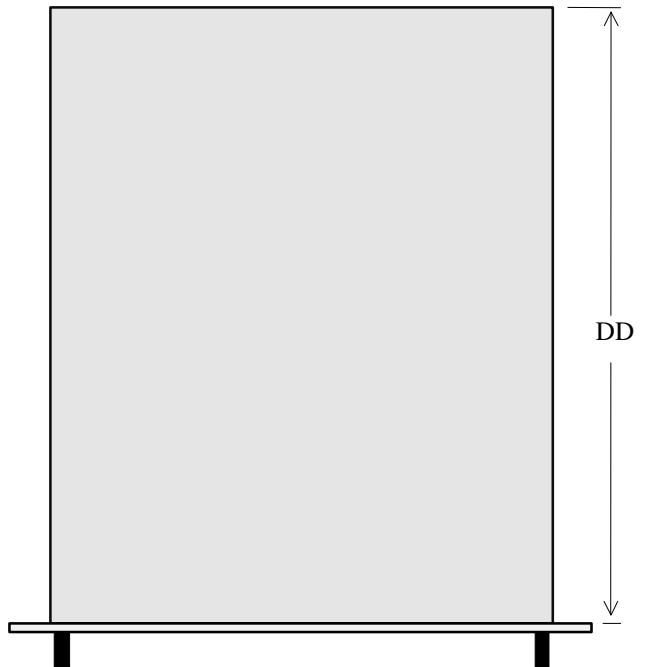

There are some sizes which have been asked for frequently from our customers. We are trying to serve you faster by stocking those popular sizes with raw finish. Upon your request, we will do the final finish and ship to you within a few days.

SEMI-CUSTOM CHASSIS

Front panel can be 1/8" or 3/16" thick aluminum alloy (5052-H32), all other panels are 0.09" thick. Chassis come with 6-32 press-nuts and stainless steel screws.

Optional vent holes on top/bottom or sides, punch holes on front and back panels. Silk screen printing is also available. For structural information, please see 10 series. To specify the color of your chassis, please attach to the suffix-x:

- A gold alodine
- R painted blue
- B black anodize
- C clear anodize
- E painted beige
- S black anodize front & gold body
- G painted gray
- N clear alodine
- P painted black
- R painted blue
- U unfinished
